

Teacher Jenny

To make the game of Chess fun and engaging for all kids!

Our inquisitive Teacher Jenny has played chess since the tender age of 6, and believes that the game of chess had a huge influence not only in her cognitive skills, but more importantly in shaping her character and emotional strength. She went on to hold numerous leadership positions and pursue robotics and game development when the field was still in its early stages here in Singapore. She hopes to share her knowledge and interest in the game of chess with little ones, utilizing her knowledge of game development to make the classes age-appropriate, fun and engaging!

2007: Placed third in the Singapore Chess Federation National Competition

Developed games that would aid elderly in occupational therapy
